## Model Containers - Get

Reference

👍 Feedback

Service: Machine Learning

API Version: 2024-04-01

### In this article

[URI Parameters](#)

[Responses](#)

[Examples](#)

[Definitions](#)

Get container.

HTTP

📋 Copy

▶ Try It

GET <https://management.azure.com/subscriptions/{subscriptionId}/resourceGroups/{resou>

## URI Parameters

🔗 Expand table

Name	In	Required	Type	Description
------	----	----------	------	-------------

<b>name</b>	path	True	string	Container name. This is case-sensitive.
<b>resourceGroupName</b>	path	True	string	The name of the resource group. The name is case insensitive.
<b>subscriptionId</b>	path	True	string	The ID of the target subscription.
<b>workspaceName</b>	path	True	string	Name of Azure Machine Learning workspace.  Regex pattern: <code>^[a-zA-Z0-9][a-zA-Z0-9_-]{2,32}\$</code>
<b>api-version</b>	query	True	string	The API version to use for this operation.

## Responses

 Expand table

Name	Type	Description
200 OK	<a href="#">Model Container Resource</a>	Success
Other Status Codes	<a href="#">Error Response</a>	Error

## Examples

### Get Workspace Model Container.

#### Sample Request

HTTP
<div> <div>HTTP</div> <div>Copy</div> </div> <pre>GET https://management.azure.com/subscriptions/00000000-1111-2222-3333-444444444444</pre>

#### Sample Response

Status code: 200

JSON

 Copy

```
{
  "id": "/subscriptions/00000000-1111-2222-3333-444444444444/resourceGroups/testrg123",
  "name": "testContainer",
  "type": "Microsoft.MachineLearningServices/workspaces/models",
  "properties": {
    "description": "Model container description",
    "tags": {
      "tag1": "value1",
      "tag2": "value2"
    }
  },
  "systemData": {
    "createdAt": "2020-12-01T12:00:00.000Z",
    "createdBy": "John Smith",
    "createdByType": "User",
    "lastModifiedAt": "2020-12-01T12:00:00.000Z",
    "lastModifiedBy": "John Smith",
    "lastModifiedByType": "User"
  }
}
```

## Definitions

 Expand table

Name	Description
<a href="#">AssetProvisioningState</a>	Provisioning state of registry asset.
<a href="#">createdByType</a>	The type of identity that created the resource.
<a href="#">ErrorAdditionalInfo</a>	The resource management error additional info.
<a href="#">ErrorDetail</a>	The error detail.
<a href="#">ErrorResponse</a>	Error response
<a href="#">ModelContainer</a>	
<a href="#">ModelContainerResource</a>	Azure Resource Manager resource envelope.
<a href="#">systemData</a>	Metadata pertaining to creation and last modification of the resource.

## AssetProvisioningState

Provisioning state of registry asset.

 Expand table

Name	Type	Description
Canceled	string	
Creating	string	
Deleting	string	
Failed	string	
Succeeded	string	
Updating	string	

## createdByType

The type of identity that created the resource.

 Expand table

Name	Type	Description
Application	string	
Key	string	
ManagedIdentity	string	
User	string	

## ErrorAdditionalInfo

The resource management error additional info.

 Expand table

Name	Type	Description
info	object	The additional info.
type	string	The additional info type.

## ErrorDetail

The error detail.

 Expand table

Name	Type	Description
additionalInfo	<a href="#">ErrorAdditionalInfo[]</a>	The error additional info.
code	string	The error code.
details	<a href="#">ErrorDetail[]</a>	The error details.
message	string	The error message.
target	string	The error target.

## ErrorResponse

Error response

 Expand table

Name	Type	Description
error	<a href="#">ErrorDetail</a>	The error object.

## ModelContainer

 Expand table

Name	Type	Default Value	Description
description	string		The asset description text.
isArchived	boolean	False	Is the asset archived?
latestVersion	string		The latest version inside this container.
nextVersion	string		The next auto incremental version

properties	object	The asset property dictionary.
provisioningState	<a href="#">Asset Provisioning State</a>	Provisioning state for the model container.
tags	object	Tag dictionary. Tags can be added, removed, and updated.

## ModelContainerResource

Azure Resource Manager resource envelope.

[Expand table](#)

Name	Type	Description
id	string	Fully qualified resource ID for the resource. Ex - /subscriptions/{subscriptionId}/resourceGroups/{resourceGroupName}/providers/
name	string	The name of the resource
properties	<a href="#">Model Container</a>	[Required] Additional attributes of the entity.
systemData	<a href="#">system Data</a>	Azure Resource Manager metadata containing createdBy and modifiedBy informa
type	string	The type of the resource. E.g. "Microsoft.Compute/virtualMachines" or "Microsoft

## systemData

Metadata pertaining to creation and last modification of the resource.

[Expand table](#)

Name	Type	Description
createdAt	string	The timestamp of resource creation (UTC).
createdBy	string	The identity that created the resource.
createdByType	<a href="#">created ByType</a>	The type of identity that created the resource.

lastModifiedAt	string	The timestamp of resource last modification (UTC)
lastModifiedBy	string	The identity that last modified the resource.
lastModifiedByType	<a href="#">created</a> <a href="#">ByType</a>	The type of identity that last modified the resource.
