What's next

Vertex AI includes the following tools to help data scientists and software engineers develop machine learning (ML) workflows:

- The [Vertex AI SDK](#) is a comprehensive set of classes written in Python that lets you automate an ML workflow. With the Vertex AI SDK, you can use the [Python language](#) to accomplish anything you can do in the Google Cloud console. For more information, see [Introduction to the Vertex AI SDK](#).
- Vertex AI Workbench is a [Jupyter notebook-based development environment](#) that data scientists can use for their entire ML workflow. For more information, see [Introduction to Vertex AI Workbench](#).
- [Terraform](#) is an infrastructure-as-code (IaC) tool that you can use to provision resources and permissions for multiple Google Cloud services, including Vertex AI. For more information, see [Terraform support for Vertex AI](#).

### What's next
